The **International Journal of Action Research** provides a forum for an open and non dogmatic discussion about action research, both its present situation and future perspectives. This debate is open to the variety of action research concepts worldwide. The focus is on dialogues between theory and practice.

The **International Journal of Action Research** is problem driven; it is centered on the notion that organizational, regional and other forms of social development should be understood as multidimensional processes and viewed from a broad socio-ecological, participative and societal perspective.

The **International Journal of Action Research** is a refereed journal, appearing three times a year. The editors invite contributions from academic social sciences, giving special attention to action research and action research practice, to conceptual and theoretical articles pertaining to its focus and to discussions on the changing worlds of work and society.

To submit relevant articles, please contact:
